

SAVE THE DINOSAURS

Once upon a time, there was a dinosaur, a brontosaurus, a pterodactyl, and some weird-looking sea creatures and plants. Before long the whole bunch became part of a layer of organic matter. And after a little heat and pressure, they formed underground pools of crude oil—the same oil we're using today to drive our cars, heat our homes and perform a thousand other vital jobs.

The problem is that we're plumb out of dinosaurs, pterodactyls and the like. And it doesn't look as if they're coming back. That's why, at Chevron, in addition to continuing our efforts to increase our domestic supply of energy, we're also helping to conserve energy. And we're reminding people of the need to avoid wasting gasoline. All of us must work together to help America achieve greater energy independence.

So the next time you jump in your car, remember that some dinosaur or other prehistoric creature gave his or her all for that tank of gasoline.

Go easy—and America's energy will go a lot further.
